INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/IB2004/050238

عد	10/549620	
	Box No. I Basis of the report	
1.	With regard to the language, this report is based on the international application in the language in which it w filed, unless otherwise indicated under this item.	a
	 □ This report is based on translations from the original language into the following language, which is the language of a translation furnished for the purposes of: □ international search (under Rules 12.3 and 23.1(b)) □ publication of the international application (under Rules 12.4) □ international preliminary examination (under Rules 55.2 and/or 55.3) 	
2.	With regard to the elements* of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):	sl
	Description, Pages	:-
	1-5 as originally filed	
	Claims, Numbers	. 2.2.
	1-8 as originally filed Drawings, Sheets 1/2-2/2 as originally filed	
• • •	현실하다 경우님 문제를 하고 한 물로 하다 됐다면서 그렇게 하는데 지수를 지수 없다고 있다.	
•	a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing	
3.	☐ The amendments have resulted in the cancellation of: ☐ the description, pages ☐ the claims, Nos. ☐ the drawings, sheets/figs	
•	☐ the sequence listing (specify): ☐ any table(s) related to sequence listing (specify):	
4.	This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)). the description, pages the claims, Nos. the drawings sheets/figs the sequence listing (specify): any table(s) related to sequence listing (specify):	•
	* If item 4 applies, some or all of these sheets may be marked "superseded."	

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N) Yes: Claims 2,3

No: Claims 1, 4-8

Inventive step (IS) Yes: Claims

No: Claims 1-8

Industrial applicability (IA) Yes: Claims 1-8

No: Claims

2. Citations and explanations (Rule 70.7):

see separate sheet

Re Item V

(SEPARATE SHEET)

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

- D1: US-A-4 903 717 (SUMNITSCH FRANZ) 27 February 1990 (1990-02-27) cited in the application
- **D2:** DE 198 07 460 A (SEZ SEMICONDUCT EQUIP ZUBEHOER) 15 April 1999 (1999-04-15)
- D3: PATENT ABSTRACTS OF JAPAN vol. 2000, no. 20, 10 July 2001 (2001-07-10) & JP 2001 077082 A (TAKATA CORP), 23 March 2001 (2001-03-23)
- D4: US-A-5 678 116 (KITAGAWA MASARU ET AL) 14 October 1997 (1997-10-14)

a. Lack of novelty:

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1 and 4-8 is not new in the sense of Article 33(2) PCT.

The document D1 discloses a device for wet treating a flat plate-like substrate according to claim 1.

It is to mention that the exhaust influencing means, which is associated with a least one of said two exhaust levels for selectively varying gas flow conditions in at least two exhaust levels could be a pump system which is related to the gas exhaust area.

It is also quite clear that such a pumping system is always connected with intermediary valves and connectors.

Document **D1** discloses as well the **method** of controlling the gas flow within a device for wet treating a substrate **according to claim 7**. It is to mention that the gas flow condition are implicitly different in a plurality of stacked exhaust levels as disclosed in **D1**.

Claims 4-6 and 8 are constructional details and method step that are known from document **D1**.

Furthermore, Claims 1 and 4-8 are also disclosed in each of document D2 and D3.

b. Lack of inventive step:

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 2 and 3 does not involve an inventive step in the sense of Article 33(3) PCT.

The use of valves as means of influencing and controlling the gas flow within a device as know form D1 does not involve an inventive step as it is obvious to the skilled person of the art to introduce such feature which is disclosed in Document **D4** to solve the same problem.
